VERY DULL POLLING IN CITY

Mysore, Feb. 16

The polling in the three constituencies in the city was very dull yesterday and it is estimated to be between 40 and 45 per cent. This may be ascribed to the indifference of the voters.

There was no excitement or enthusiasm found in the city.

Altoough polling was very dull in the morning it picked up in the afternoon.

In some of the booths in Narasimharaja constituency, there was heavy polling.

In some booths (all three coostituencies) women voters outnumbered men.

There were some complaints of impersonation and tender votes being exercised in one or two booths and the Returning Officer confirmed that he had received such a complaint.

In the rural areas, in K. R. Nagar, Hunsur, Periyapatna, heavy polling is reported. In some booths, there were more women queing to exercise their franchise.

80 P.C. VOTING IN BELGAUM

Over 80 per cent polling was recorded in the border city of Belgaum, the bone of contention between Mysore and Maharashtra, where the atmosphere was tense even after the polling was over yesterday.

3 Killed In Andhra Poll

Two persons were stabbed to death yesterday at Gadila Lanka village (Andhra Pradesh) by supporters of a rival candidate when the deceased went to Harijan colony for canvassing of votes.

A Left Communist, Lakshminarasayya was murdered on Tuesday night at Pandinipalli in Andhra by Venkatakrishna Reddy, identified with the Congress.

One Meal A Day For 24m Persons

The total demand for foodgrains in India by the end of the fifth plan (1975-76) would be of the order of 152 million tons, according to the Reserve Bank of India Bulletin.

Due to widespread drought, production receded sharply to 73 million tons last year. The current year is estimated to yield between 80 and 85 million tons.

Besides increase in population, the under-nutrition of a large number of population is one of the important factors leading to rapid rise in foodgrains demand at present.

During 1959-60 about one-tenth of the urban population and two-fifths of the rural population were under-nourished.

The intensity of hunger i.e. percentage of shortfall in intake to nutritional requirements varied between 22 per cent and 55 per cent in rural areas and 21 and 38 per cent in urban areas. In other words about 24 million persons were subsisting on just one meal a day and other 125 million persons had to go without a meal every alternate day.

Model Polling Booth

Mysore, Feb. 16

Some enterprising leaders in Kumbarakoppal, situated in the outskirts of the city, had a novel method of educating the voters.

An exact replica of the polling booth had been constructed about a few yards away from the official polling booth, where the voters were told how to exercise their franchise on the polling day.

With the result, that at 4 p.m. yesterday, out of 1800 voters in the village, nearly 1,700 voters had finished their voting.

Voter Dies In Booth

An aged man in Holenarasipur died after casting his vote yesterday.

65-year-old Karimathiah went to the polling booth and after exercising his franchise collapsed before the booth and died.

Poll Marred By Bidar Riots

The first day's poll in Mysore State was marred by violence which broke out yesterday at Bidar and Channapatna.

Rioting and looting followed a clash between the two opposing parties in Bidar town and the police brought the situation into control by bursting tear-gas shells.

Trouble started when some polling agents challenged the identity of voters. It spread and a pawn-shop was burnt down. Some cases of arson were also reported.

Four persons were admitted to hospital in Channapatna town for injuries sustained following a clash between two opposing parties. The incident which sprang from an altercation between the agents of two candidates with the range of a polling booth, held up polling for 45 minutes. Police intervened and peace was restored.

The police prevented an ugly poll clash in Korati Hutchmaranahalli in Tumkur District. As the polling was progressing, difference of opinion on the method of persuading voters arose between the two parties and the situation became tense. When both parties were ready to exchange blows, the police arrived and dispersed the crowd.

Site For Cong. Opposed

Mysore, Mar. 2

A strong opposition to give 11,000 square feet area of Bhoodevi Farm near Railway Station to the District Congress Committee to construct a building was made by the Opposition members at the Municipal Council on Tuesday. Sri M.K. Lingiah, President, presided.

The Government has agreed to the proposal of the City Improvement Trust Board to allot the area to the District Congress Committee. When the recording of the Government Order came for consideration, the Opposition members criticised the allotment of the site.

The members said the site was well suited for constructing a tourist hotel deriving income of Rs. 2-3 lakhs. On the other hand it was being offered to the Congress Party at a meagre rate of Rs. 12 per annum for 99 years.

After prolonged discussion, when the subject was put to vote, it was passed by 12-7.

Members, both the Opposition and theCongress, also urged for the revision of the voters list. The voters list, they said, was full of mistakes and omissions.

NIJALINGAPPA SWORN IN AS CM

Bangalore, Mar. 3

Sri S. Nijalingappa who was unanimously elected leader of the Mysore Legislature Congress Party yesterday, was sworn in this morning as Chief Minister. Governor Giri administered the oath of office to Sri Nijalingappa.

The ceremony was attended by out-going Ministers, senior government officers headed by Chief Secretary Balachandran and other dignitaries.

After swearing in ceremony which lasted for ten minutes, the Chief Minister was garlanded by Governor Giri.

Later, speaking to newsmen, the Chief Minister said that effective steps would be takrn to hold the price line.

The primary problems in the State were food and industrialisation and his Government would give all encouragement to develop these two, said.

Sri Nijalingappa said that he was all for inter-State cooperation and co-ordination. He was also concerned with equitable distribution of surplus foodgrains among neighbouring States. He favoured the inter-State food zone so that surplus food could move freely to deficit areas within the zone. He also welcomed inter-State power-grid and assured Mysore would part with its surplus power to needy neighbouring States.

Sri Nijalingappa yesterday addressing his partymen appealed for the whole-hearted cooperation of all shades of opinion in his own party, of the opposition and of the people in solving the problems before the State. The important task of the Government was to make people happy.

The new Ministry is likely to be announced within the next three days.

JP WANTS ZAKIR FOR PRESIDENT

Sarvodaya leader Jaya Prakash Narayan yesterday brushed aside suggestion by the PSP and Jan Sangh that he should contest the Presidential election due in May.

Asked about his reaction to the proposal of his name, he said: "No, I am not in the least interested. I should have thought that this time too the choice was so obvious that there should have been no other name considered. Not only has Dr. Zakir Hussain filled his present office with great dignity and ability, he is also eminently fitted for the highest office in the land".

CHARGES AGAINST TEJAS

Charges of criminal breach of trust, falsification of accounts and using forged documents to defraud the Government and banks to the tune of Rs. one crore have been filed against Dr. Dharma Teja, former chairman of the Jayanthi Shipping Company and his wife Smt. Ranjit Teja in New Delhi Magistrate Court.

The Government of India has requested the United States authorities to extradite Dr. Teja. He was arrested by US immigration authorities in the US last month.

TIGHT DRESSES BANNED

The Chief Secretary of Haryana State has issued a circular to department heads that Government views with concern the growing trend of women employees wearing skin-tight dresses in government offices and educational institutions. Officers have been asked to discourage women from wearing close-fitting, distracting apparel.

Food & Rising Prices To be Tackled

INDIRA GANDHI'S PLEDGE

Smt. Indira Gandhi, the newly elected leader of the Parliamentary Congress Party, stated yesterday that food, rising prices and the economic set back were the three topmost problems that the new Government would deal with.

She said that the new Central Government would follow a policy of left of the centre and added that it was only such a policy that would help solve the problems of poverty faced by the masses of our people.

The Prime Minister said that her new cabinet would consist of both old and new elements. She said she was a strong believer in infusing new blood but nevertheless, experienced senior men had to be included in the cabinet.

Smt. Gandhi said she was calling a conference of Chief Ministers to discuss not only the food situation but also questions like Centre-State relations, in view of the fact that several States were manned by non-Congress Governments.

The Congress Government at the Centre would cooperate with the non-Congress regimes in some of the States to the maximum extent possible and their cooperation would also be sought in the formation of policies, she said.

She said India would stick to its policy of nonalignment and peaceful coexistence in the international affairs.

The Prime Minister said that the new Government would have to face more challenges.

She said 'every challenge does evoke response. While there are many difficulties, we have shown great vitality in India. The real challenge is how this vitality should be used for constructive purposes and for the effective and proper functioning of democracy'.

RS. 350-CR. DEFICIT CENTRAL BUDGET

GLOOMY ECONOMIC SITUATION

A deficit budget of Rs. 350 crores for the year 1967-68 was presented to the Lok Sabha yesterday by Finance Minister Morarji Desai.

Presenting a sombre picture of the economy, the Finance Minister said that assistance to the States to clear their overdrafts, drought relief measures and the subsidised sale of foodgrains and fertilisers had pushed up the current year's deficit of the Centre from the estimated Rs. 32 crores to Rs. 350 crores.

He announced that the expenditure had been restricted to the resources in sight at present. He said the Plan expenditure had been cut from Rs. 2081 crores to Rs. 1711 crores.

Sri Morarji said that the first year of the fourth plan which was drawing to a close, had proved disappointing in many ways.

The economic situation caused concern not only because output was low and the foreign exchange position disconcerting, but also because prices were spiralling despite a contraction in money supply, he said.

He said that food production in 1966-67 would be as low as 75 million tons as against 89 million tons two years ago.

Industrial production too might not show an increase of more than 2 6 per cent, the lowest in many years. The data relating to exports during April-December 1966 also showed a decline of 9 per cent.

Sri Desai pointed out that the most disturbing factor was the unabated rise in prices which the Government had to keep constantly in mind in formulating its financial and economic policies. The price rise must be halted by concerted action on many fronts.

Additional taxation to raise resources seems inevitable and he said 'it shall be our endeavour to explore all possible avenues of mobilising additional resources".

Sri Morarji placed the revenue for 1967-68 at Rs. 3,070.76 crores, Rs.214 crores more than the current year's revised estimates.

Defence expenditure in the next financial year would be Rs. 969 crores, Rs. 27 crores more than in the current year.

Market loans have been assumed at Rs. 350 crores and foreign aid excluding PL 480, has been placed at Rs. 835 crores.

The public debt at the end of the current financial year rose by Rs. 2,831.78 crores. This amount will go up to Rs. 11,726.31 crores at the end of 1967-68.

SRAVANABELAGOLA FESTIVAL

Mysore, Mar. 21

The Mahamastakabhisheka Sammelana at Sravanabelagola will be inaugurated on March 30, the day of Mahamastakabhisheka, at 12 noon by Chief Minister Nijalingappa.

The 72nd All India Digambara Jaina Mahasabha Sammelana will be held on the next day. Mysore University Vice-Chancellor K. L. Shrimali will preside.

A small fee of 25 paise will be levied per head on the devotees going up the Chandragiri hill. The proceeds will be utilised for the development of the Kshetra.

A sum of Rs. 1.10 lakhs has been spent for providing water and Rs. 1.50 lakhs on electricity during the festival.

About 1029 police constables, officers and "May I Help You" squads have been posted at Sravanabelagola. Two tourist offices of the State Government, at Sravanabelagola and Hassan, will work for the benefit of the tourists.

The District Magistrate has restricted the movement of vehicles to Sravanabelagola on certain routes.

POETS' CONFERENCE

Mysore, Mar. 21

A poets' conference will be held tomorrow at 9 a.m. in the Townhall as part of the Lalithakala Mahotsava, now being celebrated. Sri P.T. Narasimhachar will preside.

There will be also the City dancers' meet at 10-30 a.m., Sri M. Appaswamy presiding.

Rs. 15-CRORE DEFICIT IN RAILWAYS

Railway Minister C. M. Poonacha, presenting the interim Railway Budget to the Lok Sabha yesterday, said the railway administration is likely to close the current financial year 1966-67 with a deficit of Rs. 15.27 crores against the anticipated surplus of Rs. 22 19 crores.

He said the deficit was the result of a coincidence of a steep increase in operating expenses and a substantial shortfall in anticipated traffic.

The explanatory statement of the financial position gave strong indications of increase in railway passenger fares and freights when the full-fledged railway budget for the next year is presented to Parliament in May.

The total revenue for 1967-68 has been anticipated at Rs. 826 crores, and working expenses at Rs. 684.16 crores, the balance has been earmarked as dividend to general revenue.

Huge Arrears

Bangalore, Mar. 21

The large outstanding arrears due to the Government from various sources to the tune of Rs. 497 lakhs has been disclosed by the audit report for 1965–66.

The total public debt has gone on increasing year after year and stood at Rs. 390 crores at the end of March 1966. The Government sold securities worth Rs. 18 crores last year to repay the loans and adjust the ways and means advance with the Reserve Bank.

The report says that no irrigation projects, major or medium, is yielding reasonable financial return on the capital invested and then there is the heavy arrears (Rs. 123 lakhs) in respect of water rate collection.

Heavy shortfalls in the implementation of many agricultural programmes and machinery remaining idle have been reported.

149 casas of embezzlements involving Rs. 14 lakhs were pending finalisation. 46 per cent of the cases pertains to the public works and revenue departments.

In Tungabhadra, 240 families which received laons to the extent of Rs. 69,000 left and the loans had to be written off

CENSURE MOTION REJECTED

The Lok Sabha yesterday rejected the Jan Sangh–sponsored no-confidence motion in the Union Government by 257 votes to 162.

Prime Minister Indira Gandhi, intervening in the debate, appealed to the Opposition parties to cooperate with the Government in restoring normal conditions in Rajasthan so that the State Assembly there could be convened at an early date. The President's rule would be for a short period, until the constitutional confusion was sorted out, she said.

She said with the non-Congress Governments coming into power in so many States, it had become imperative that some kind of understanding should be evolved between the Congress and the Opposition parties to ensure a smooth Centre–State relations

CIA SCANDAL

Deputy Prime Minister Morarji Desai admitted in the Lok Sabha yesterday that he was connected with the Indian branch of the World Assembly of Youth which was alleged to have received funds from the CIA, the spy organisation of the United States

Many MPs alleged that CIA funds had been made use of during the elections to get 44 progressive Parliamentarians defeated, that Svetlana Stalin had been whisked away by the CIA and that American spies were parading as diplomats in the country.

Sri Morarji said that the World Assembly of Youth had a branch in India and was putting up an international house for youth. He was the chairman of the board of trustees of that body. He added that he was told by the managing trustee Ramakrishna Bajaj that he had received some money from Germany and the United States.

LAND REVENUE ABOLISHED

DISCONTINUANCE OF LAND SURCHARGE

Bangalore, Mar. 25

The abolition of land revenue in Mysore State in the present form and discontinuance of surcharge on land revenue are the two other features of the 1967-68 Budget estimates presented to the Assembly by Finance Minister Ramakrishana Hegde yesterday.

The suitable amendment of the Prohibition Act will bring in an additional revenue of Rs. 4 crores.

Though the Finance Minister did not propose any new taxes, he said that the Government would introduce Bills to raise inter-State sales tax from two to three per cent and to rationalise the agricultural income-tax.

The Government's decision to do away with land revenue will involve a loss in the revenue to the tune of Rs. 6 to 7 crores.

The abolition of the land revenue and surcharge on land revenue does not, however, mean that the Government would not collect the arrears. This was made clear by the Finance Minister later.

Sri Hegde ruled out the possibility of giving any tax concessions in view of of the difficult financial position of the State.

NO DEFICIT FINANCING

Sri Hegde said that it will be our endeavour to regulate our expenditure with reference to resources and to the extent there is shortfall in resources, the Plan programme would have to be pruned and adjusted accordingly by refixing priorities.

He made it clear that deficit financing will be avoided in the implementation of the programme and the targeted expenditure will be strictly correlated to resources available.

SELF-SUFFICIENCY IN FOOD

Mysore is marginally deficit in the production of foodgrains. This margin will be made up within the next few years. We are determined to make the State self-sufficient in foodgrains by the end of the fourth plan, he said.

"I have no doubt that within next few years the districts of Shimoga, Chitradurga, Bellary and Raichur will be the granary of the entire State, and meet all its requirements and if need be, export foodgrains to other States", Sri Hegde said.

Mysore, Mar. 25

Dr. Atma Ram, Director General of Scientific and Industrial Research, yesterday visited the Central Food Techonlogical Research Institute. He went round the Institute accompained by Sri M.G. Krishnamurthy, Secretary of CSIR.

Dr. Atma Ram, addressing the scientists, said that they should lay down a very high sense of priority for the problems of research in the context of the difficult period through which our country is passing today.

He said the available resources should be concentrated selectively on problems relevant to the country rather than spread over a wide area of problems. The scientific laboratories will win the confidence of the people by the results they achieve and not by the number of problmes that they are engaged in.

Dr. H.A.B. Parpia, Director of the Institute, welcomed the Director General.

MEASURES TO HOLD PRICES

Deputy Prime Minister Morarji Desai told newsmen yesterday that he would try to formulate measures aimed at not merely holding the price line but in bringing down the cost of living.

He said that he would make a major effort to see that the outlay on the fourth plan correspond to the resources that could be raised. He firmly ruled out deficit financing in the fourth plan and curb the tendency to resort to overdrafts by States.

Sri Desai declined to answer any questions about the nature of proposals he was contemplating to hold the price line and the kind of taxes he was likely to impose, but implied that there would not be any heavy taxation in the forthcoming final budget.

The Minister also said that the Central Bureau of Investigation was investigating not merely the CIA funds but funds coming from other sources also including the Soviet Union.

SERIOUS FOOD SITUATION

CENTRE'S WARNING

The Central Government yesterday warned that a 'serious food situation may develop' in the remaining months of this year and called for the maximum cooperation from the States in intensifying procurement.

In a review of the food situation prepared by the Union Food Ministry, the Government said this serious food situation had developed because of the second successive year of unprecedented drought, particularly in Bihar and parts of UP.

Another factor is the drying up of the pipeline. Again there is uncertainty regarding imports of wheat and larger retention af foodgrains on the part of producers.

The survey has admitted that the position in regard to rice is extremely difficult. The gap between availability and needs has widened as a result of the big shortfall in rice production and poor procurement.

As against the shortage of eight million tons in rice, the total marketable surplus in the world is only seven million tons. India cannot buy all this even if the requisite foreign exchange was available.

The monthly distribution of 1,30,000 tonnes of rice to the States by the Centre have to be reduced.

'But they cannot do it by sending drafts on me, that I must fill any losses. They have to find alternative methods to see that the money is provided. They cannot say that overdrafts will always be there and that they must be accommodated'.

He said the Centre and States had equal interest in seeing that the economy was healthy. It was not the theory of the Union Government that the Centre existed for itself and the States were something alien.

DefaulterCo-ops. On Increase

Mysore, Apr. 3

The primary co-operative societies in the State were working in an unsatisfactory condition and the number of defaulter societies was on the high, said Health Minister K. Puttaswamy here yesterday.

He was inaugurating the second conference of the co-operative field workers of the district.

Sri B.C. Lingiah, President, District Central Co-operative Bank, welcomed the gathering.

Sri Puttaswamy said the filed workers had to consider these two main problems and suggest suitable measures. It was not only the societies which remained defaulters failing to pay the debts but even the members of the executive committees remained defaulters, he said.

Co-operation Minister P. M Nadagowda, who presided, stressed the need for recovery of loans.

Sri Nadagowda disclosed that the Co-operation Department was considering introducing Integrated Planning to help farmers to increase agricultural production.

He also thanked the Mysore Univresity for taking the intiative to start a Degree Course in Co-operation.

Sri G. A. Jamakhandimutt, Registrar of the State Co-operative Societies, was also present.

All Fools Gather

Mysore, Apr. 3

All Fools Day was celebrated here on April 1 under the auspices of the YMCA at the Townhall by 'all fools' of the city.

The function started with vote of thanks by Sri Syed Iqbal Khadri. He claimed the distinction of establishing a new tradition of proposing vote of thanks at the outset itself.

'The Servant of the Ceremony' R S Krishna Swamy introduced the guests, including Municipal President M.K. Lingiah who called himself the "greatest of all fools" present.

Sri M. N. Parthasarathy, Cricket Commenatator, welcoming the fools of the day, said the happiest person in the world was the fool because the fool was always at an advantange that he could not be fooled.

He said: "This is the greatest courageous act done after the Independence". Mysore City has taken the lead in acknowledging ourselves as fools.

Sri H. Subbarao, 72-year-old humourist-advocate, claimed himself as the oldest fool present and said oldest fool is the genuine and permanent fool because youngmen had chances of recovery but the old would die as fools.

The function included music, humourous skits and a variety of programmes.

"Real fools were those who had bought the tickets but missed the function thinking that they would be fooled because only about 40 per cent of them were present".

SEN NOT FOR 3-LANGUAGES

Union Education Minister Triguna Sen stated yesterday that he was opposed to the three-language formula because it over-burdened the child. He said 'a child cannot learn three languages at a time'.

Dr. Sen said he believed that the mother-tongue should be the medium of instruction at all levels. He did not think the multiplicity of languages in our country was an obstacle to the adoption of this principle.

When asked about the place of English and the medium of instruction, Dr. Sen said facilities should be provided to students to learn any language. It was for the State Governments to decide from which standard English should be taught.

He said that the regional language should be the medium of instruction at all levels. A child could not develop his personality with any other language. This could be done only through mother-tongue.

He also was not in favour of making education, now a State subject, a concurrent subject. 'I believe that it is better to delegate powers to States than to dictate them'.

First Mineralogical Institute

Mysore, Apr. 5

Chief Minister Nijalingappa inaugurated at Manasa Gangotri yesterday the Mineralogical Institute, the first of its kind in the country.

Sri Nijalingappa said Mysore State had abundant resources of minerals like iron, manganese, bauxite and copper. These minerals should be utilised to the maximum extent and help economic development of the State.

Inspite of adverse opinion by Delhi experts, magnetite ore with 40-45 per cent richness had been found and this could be used for setting up a plant in Mangalore.

He said in his own place, near Chitradurga, copper had been found and he was very much interested in its exploitation in view of dearth for copper.

The Chief Minister called upon the Institute, along with its scientific research, to undertake work as to how best these minerals could be utilised for purposes of social enrichment of the people.

A meagre one or two lakhs of rupees was insufficient for the institute and assured Government's aid and also help from industrialists.

Dr. K. L. Shrimali, Vice-Chancellor, who presided, stressed the need for link between the University on one side and Society and Government departments on the other.

He also said that the Universities should not depend too much on the Government but must seek help from other sources including industrialists.

Prof. P.R.J. Naidu, the well-known mineralogist and Director of the Institute also spoke.

Prof. M. N. Viswanathiah welcomed the gathering and Sri D.V. Urs proposed a vote of thanks.

Tackle National Problems

PM'S APPEAL TO OPPOSITION

Prime Minister Indira Gandhi yesterday appealed to all political parties to come together on 'some kind of minimum programme' to tackle the national problems facing the country.

She told the Lok Sabha that elections had thrown up certain political challenges but nevertheless the real challenge 'continues to be an economic challenge, that of prices and production'.

On the question of official language, the Prime Minister assured non-Hindi States that there was no attempt to impose Hindi on them. The proposed bill to retain English as the associate link language would be brought before Parliament at its next session.

Smt. Gandhi said that the Union Government would work together with the State Governments irrespective of their political complexion in national interests. She said she was heartened at the kind of response and co-operation received from the new Governments in the States.

She said the Planning Commission would become an expert body and the National Development Council would assume greater importance in planniag.

The Prime Minister said Government had nearly formulated its views on the recommendation of the Administrative Reforms Commission to appoint a 'Lok Pal' and 'Lok Ayukt' to deal with cases of corruption.

MAKE MYSORE MODEL TOURIST CITY

Mysore, Apr. 14

Sri M. S. Gurupadaswamy, Minister of State for Atomic Energy, today suggested to the Mysore City Municipality to undertake such schemes which would develop the city into a model tourist city in the world.

Sri Gurupadaswamy was accorded a reception by the civic body, this morning.

Municipal President M.K. Lingiah welcoming the Minister requested him to use his good offices in getting the Chamarajanagar—Satyamangalam railway line included in the Fourth Plan. He said the Centre was showing a step-motherly attitude towards this line and the citizens had to protest strongly.

The Minister thanked the Council for its reception. He said Mysore City had its own personality. The Municipality should think of schemes like starting of standing cafetaria in tourist spots of the city where tourists could buy snacks, curio shops where young men and women trained in the art of salesmanship should sell products of Mysore to foreigners, provide entertainments to tourists and make Mysore, the city of lights with better lighting.

Sri Gurupadaswamy said that the Government had given priority to tourism next only to agriculture and the new Minister Dr. Karan Singh was all interested in its promotion. Hence the Council should ask for tourist industries, he suggested.

Regarding establishment of Nehru Loka, he said mere allotment of wide area like 3,600 acres did not make a Nehru Loka. The Dsneyland in USA had occupied only 35 acres but needed a week to see. He suggested to form the Nehru Loka in a smaller area with the expert advise.

Referring to the need of establishing industries in the city, the Minister said Mysore could grow into a 'CFTRI Town' with scientific researches evolved in the CFTRI being brought to new food processing industries, which could be established here. He appealed to the big financiers in the city to come forward and start food processing industries here.

He said that he wanted the city to grow as a city of learning and city of lights.

Referring to the demand of Chamarajanagar-Satyamangalam line, Sri Gurupadaswamy said that regarding new railway lines national priorites and local needs had to be balanced. He was also one among those who urged for this railway line, he said. He suggested to keep on pressing for the new line but not to resort to any agitation.

Vice-President Doulat Rao proposed a vote of thanks.

Develop Managerial Talent

Mysore, April. 14

Sri M. S. Gurupadaswamy, Minister of State for Atomic Energy, warned industrialists here yesterday that unless they developed proper managerial potential,industries would not survive in the country.

He was addressing the members of the Mysore District Small Scale Industries Association.

Sri Gurupadaswamy said inspite of Government's facilities like relaxation of controls response from industrialists was poor. Government alone could not start industries. Private sector had larger area in India. Governmental sector in this country was only seven per cent whereas in USA it was 14 per cent, he said.

The major bottleneck before the industrialists today was lack of managerial and organisational talent. Unless this lacuna was filled by both the Government and the private industries, industries would not survive He cited examples of some industries which had failed to function due to incomeptent management.

The Minister also called upon for a change in the financial procedures of industrial financial institutions like the Industrial Financial Corporation and the Life Insurance Corporation. Their procedures of loans and assistances should be made easy to facilitate quick industrialisation.

Sri Gurupadaswamy said though the basic policies and programmes of the Government were sound, he admitted their implementation had not been properly attempted. That was the reason for stagnation in industrlisation and fear amongst people about shape of things to come.

Administration was an important thing. It had to be streamlined and procedures should be simplified. That was why the Government had appointed the AdministrationReforms Commission, he added.

Earlier, Sri A. S. Ganeshmurthy, Secretary, welcoming the Minister pleaded for abolition of octroi for small industries, easy credit, raw material and marketing facilites. Sri B. Basaviah President, presided. Sri M.S.V. Raghavan proposed a vote of thanks.

Border Status Quo Urged By Engineers

Bangalore, Apr. 22

As many as 68 delegations of individuals and groups gave evidence before the Mahajan Commission during the three-day sitting here. It concluded its work here yesterday.

Sri Mahajan will record evidence at Bidar on Apr. 23 and 24 and at Gulbarga Apr. 25.

Maharashtra, which now sought village as the unit for settling its border dispute with Mysore, was not prepared to apply the principal when Bombay State was bifurcated. This was told to the Commission by Sri Ganji Veerappa.

The Institution of Engineers of Mysore Branch submitted a memorandum contending that any kind of reorganisation in the boundaries of Mysore State would upset the very economic balance of the State.

The engineers urged that apart from linguistic consideration, it was very necessary that financial, economic and administrative factors were given the highest consideration for the betterment of the State in particular and the country in general.

They stressed how vital it was for the State to develop its economically backward areas in the northern and western regions to bring about fruitful exploitation of the potential economic resources If the food deficit of nearly one milion tons in the State was to be met, particularly in the under-developed areas of Gulbarga, Raichur, Bijapur, Belgaum, Karwar and Dharwar, it was necessary to integrate the water potential in the catchment areas in the respective river valleys for proper and effieient utilisation.

Sri Diwakar pleaded for status quo, except for some minor adjustments if they were found very necessary.

A women's delegation also deposed urging for the maintanence of statues quo.

Mysore, Aps. 27

A Rs. 50,000-Children's Museum will come into being in the city thanks to the Rotary Club of Mysore.

Club Rotary has already to its credit a children's libary, the first such one to be started in the country by the Rotarians.

Sri Farook Irani, past Governor of the Rotary Club and Sri P.R.Sitaram, secretary of the library, told newsmen here yesterday that the proposed museum to be housed in the library with an auditorium, would not merely be a house where dolls were kept for children. It would have a scientific basis, with children being taught the working of scientific apparatus.

Rotarian N. N. Sastry said that the museum would arrange periodical exhibitions. Classes in painting for kids would also be held.

The Rotary Club has appealed to the people to help in making its ambitious project a success.

The club has arranged a variety entertainment by the wellknown Kannada film artists on May 1 at 6 pm at the Town hall in aid of the funds.

2-Language Formula

The committee of members of Parliament on education has recommended a two-language formula with facilities for learning a third language, instead of the three-language formula, which made study of the mother tongue, Hindi and English compulsory.

The committee said: "Only one language (which would also be the medium of education) would ordinarilly be studied in the first sub-stage of school education which would cover four or five years. But facilities should be provided on an optional basis, for the study of the regional language when it does not happen to be the medium of instruction.

A second language should be introduced on a compulsory basis, ordinarily at the beginning of the next sub-stage. This should be continued till the end of Class X. A student may begin the study at his option, of any third language of his choice. ordinarily from class XIII."

MORARJI'S CALL TO TRADE

Union Finance Minister Morarji Desai yesterday appealed to the business community to see that prices of commodities did not rise. He told them that they should not agitate to increase price in their fields of production 'even if it be a great inconvience and temporary loss'.

Inaugurating the annual session of the All-India Manufacturers Organisation, Sri Morarji expressed his confidence that 'we will be able to cry halt to rising prices' and said the Government and the business community could work in a co-ordinating manner.

Sri Desai called upon the manufacturers to desist from raising the prices of their products so as to give the Government their full support in tackling the problem of inflation.

The Finance Minister said he would do his best to help the Indian industry recover from the present recession. But the industrialists also had to do their bit in pulling the economy out of stagnation.

No Iran Arms To Pakistan

The Iranian Government has assured India that it would not give any military aid to Pakistan or supply her with arms and armaments which might be used against India.

Iran has also assured that it will not militarily support Pakistan in the event of any unfortunate Indo-Pakistan conflict in future.

This was disclosed by External Affairs Minister Chagla, who returned yesterday after his visit to Iran.

Sri Chagla said that the Iranian Government had assured him that most of the sabre jets which were transferred from Iran to Pakistan had been returned to Iran.

No New Railway Lines For Present

He told newsmen here that in future emphasis would be on developing railway goods traffic, dieselisation of engines and doubling of tracks.

The Minister assured that the 160 mile Hassan-Mangalore railway line would be completed by 1971-72.

He said the delay in the progress of Hassan-Mangalore railway line was due to the difficult terrain between Sakleshpur and Subramanya. As many as 38 tunnels had to be constructed. Rs. 4 crores had been sanctioned this year for the work.

Sri Poonacha said the rail link between Salem and Dharmapuri would be ready by June and between Dharmapuri and Bangalore by the end of this year.

Mangalore Port

Bangalore, Apr. 29

Railway Minister Poonacha assured here yesterday that the Mangalore port would be ready by 1971-72.

Allaying fears that the project was progressing at snails' pace, he said any delay was only due to the change thinking on the scope of the Mangalore port project.

The designing of the port, had to be changed more than once. The original plan was that it should be built to tackle export of 3million tons of iron ore. But after the recent developments regarding Kuduremukh ore, the idea that the port should be strengthened to handle up to 6 million tons of ore emanated.

The Japanese who had evinced keen interest in the Kuderemukh ore recommended that port capacity should be increased from the original 50,000 to one lakh ton, as it was uneconomical to transport in small vesseles.

He said now the study report was with the Transport Ministry.

MINISTERS CLASH ON 3-LANGUAGE FORMULA

Two Union Ministers clashed yesterday on the question of three-language formula.

At the inauguration of State Education Ministers' Conference at Delhi, Education Minister Triguna Sen said that too much time was spent in teaching languages at schools and added that the three-language formula would only increase the language-load on students.

But Finance Minister Morarji Desai differed and said that until the transition to instruction in regional languages was accomplished, it was essential to teach three languages in schools, including Hindi and English.

He felt that 'neither education nor the Government would be effective unless both Hindi and English were persevered with.'

Prime Minister Indira Gandhi sided with Sri Desai by saying that the language question was not purely an educational problem but had to be viewed in the widely perspective of national integration and unity.

She said 'education is an investment in human beings' This was the only way to look at the problem of education, which could not be treated as a 'party-political issue'.

White Collar Attsitude

Pointing out several deficiencies in the present educational set-up, Smt. Gandhi said it encouraged 'a white collar mentality' and denigrated the ideal of the dignity of labour. She said there was a crying need to improve the quality of the country's educational institutions.

LIBERAL IMPORTS

The import policy for 1967-68, announced yesterday, further liberalises the issue of licenses to the 59 priority industries. It covers both the large and small scale sectors of priority industries.

Import licensing in respect of these industries, which account for about 75 per cent of the total industrial production in the country, will be 'need-based and continuous'. This in effect means that the only limiting factor will be the capacity of the industries to utilise the imported raw materials or components.

Dr. Hussain is the second member of the teaching profession and the first Muslim to become India's Head of State and First Citizen.

The President-elect's reaction to his vietory was: 'My first reaction is one of humility, not the humility that smothers action, but the humility which I have felt is the quality of those who wish to grow and learn and serve, humility that gives courage and determination to give one's best to what one has been called upon to take up'.

Dr. Hussain asked the people of the nation 'to devote themselves sincerely and whole-heartedly to the building up of a better and a fuller and more graceful way of life for our people. We have have to talk less, quarrel less, work hard and even harder and hold together'.

In a statement, Dr. Hussain said that it was a great honour indeed that the nation has bestowed on a mere teacher who some 47 years ago resolved to devote the best years of his life to national education.'

'It appears to me an unequivocal recognition by my people of the fact that education is inexplicably involved in the quality of nation's life that it is indeed a prime instrument of national purpose'.

'I shall rededicate myself to the task of aleviating the sufferings of our people and shall go to Rajghat tomorrow morning to do so at the Samadhi of the great man who first showed me the way to devote myself to the service of my countrymen.'

Waiving Dues This Year

The Aid India Consortium is certain to grant India a moratorium on all foreign debts for the current fiscal year, 1967–68. The moratorium will relieve India of debt obligations of the order of 400 million dollars.

This was revealed by the President of the World Bank, Mr. George Woods, yesterday to newsmen at Delhi.

Mr. Woods admitted that the devaluation which was recommended in the Bell report, had not accomplished the aims envisaged in the report. He said failure of the monsoon for the second successive year was largely responsible for the non materialisation of the World Bank's expectations.

He said the Aid India Consortium had indicated that it would pledge 1.3 billion dollars for the current fiscal year. 'It is to be hoped that this target can be achieved'.

HATHI WARNS AGAINST GHERAOS

Union Labour Minister Jaisukhlal Hathi yesterday warned against 'gheraos' and un-coordinated Centre-State labour policies.

In his presidential address to the State Labour Ministers' conference, he said the recent phenomenon of gheraos might create a deadlock in production and have a devastating effect on the morale of management and supervisory personnel.

Making a strong plea for uniform Centre-State labour policy, Sri Hathi declared that uncoordinated policies would spell chaos.

He pleaded for solving all labour disputes by mutual consultation.

Sri Hathi conceded that a large section of workers were suffering from a sense of frustration and uncertainty arising from continually rising prices, threats of retrenchment and closures. The employers complained of shortages of raw materials, high taxes and high labour costs and indiscipline among workers.

'It is our duty to find a solution to the issues which retard production, erode wages and threaten job security', he added.

PSP TO FACE NEW AND EXCITING CHALLENGES

--GORAY

Bangalore, May 18

Sri N.G. Goray, Chairman of the Praja Socialist Party, told the party general council's inaugural session here yesterday that the post-election scene in the country presented a new challenge which was exciting.

He said while the general elections had virtually freed nearly half the country from the Congress monopoly of power, it had at the same time generated and had brought into prominence forces like the Communists who did not believe in democracy, had revived the importance of the princely orders and sectarian interests and the even the cow had become a symbol to make or mar candidates. The big business also had come in.

The multiplicity of parties had increased and the equilibrium of one-party rule had given way to uncertain conditions. He said the PSP had to face new and exciting challenges and had to work under conditions totally different from the past.

With the end of the Congress rule over the whole of the Sindhu-Ganga belt, from Punjab to Bengal, a new situation had arisen and he called upon the PSP men to strive hard to make the people in the States feel the change.

Sri Goray said the PSP was not a party of destruction and hatred. Theirs was a policy of responsible cooperation with other political parties as long as their programme was not detrimental to the interests of the country.

He said the PSP would strive to safeguard the integrity of the country and its democratic fibre in the coming period that would be full of uncertainties.

TARGETS NOT REACHED

Several vital targets set forth in the annual Plan for 1966–67, the first year of the Fourth Plan, have not been reached despite increased financial expenditure.

Latest official data on the progress of the 1966–67 Plan shows that apart from the lags in agriculture, production of fertilisers, textile machinery, aluminium, cement and coal fell short of the targets. Shortfalls in railway freight traffic, irrigation and power targets are also indicated.

WAR BREAKS OUT IN WEST ASIA

FIERCE FIGHTING ON ALL FRONTS

Full-scale war on land and in air between Arabs and Israelis broke out yesterday in West Asia.

There was widespread air attacks by Israeli planes on Egyptian airports in Cairo and elsewhere and on the canal zone, followed by fierce fighting on a wide stretch of the UAR-Isarel border from Gaza through Central Sinai to the south of the Negev.

The two countries have blamed each other for the outbreak of hostilities.

The UAR Foreign Ministry has charged Israel with 'aggression' through surprise air attacks on the UAR territory.

Israel has accused the UAR of launching an attack on Israel by moving its forcss into the Negev.

Immediately the UAR declared war, Jordan, Syria, Saudi Arabia, Kuwait, Algeria, Sudan, Moracco and Lebanon announced they had also joined the fight with the UAR.

Israel claimed it had destroyed 150 UAR planes.

On the otherhand, UAR claimed that 44 Israeli aircraft were shot down. The UAR lost two aircraft in battle but the pilots baled out to safety.

President Nasser has taken over command of the armed forces as Israeli planes started their attack of Cario.

Syrian planes had bombed Israel's Haifa oil refinery and set it ablaze.

The Syrian aircraft heavily bombed Northern Israel airfields and destroyed the greater part of the enemy's air effort, says a military spokesman of Syria.

Jordan announced that its aircraft had begun to bomb Israeli territory.

3 Indian Soldiers Killed

Israeli planes yesterday strafed a convoy of the United NationsEmergency Force and killed three Indian soldiers.

The Indian convoy was proceeding in the direction of Rofah when it was strafed by Israeli planes.

LIFT SIEZE IN 24 HOURS: INDIA'S WARNING TO PEKING

India has demanded immediote lifting of the siege on the Indian embassy in Peking and other restrictions on the Indian diplomat personnel.

Sri Desai: 'It is legally done with consent. If I am a pick-pocket, I may call you a dacoit.'

Sri Gupta: 'A dacoit is a far more honourable man than a pick-pocket.'

Need For High Protein Food

Mysore, June 27

Union Food Minister Jagjivan Ram today stressed the paramount need for developing cheap protein food and said in this direction scientists and technologists had a very important role to play.

He was inaugurating the 7-day International Symposium on Protein Foods and Concentrates at Central Food Technological Research Institute, here.

Referring to the food shortage due to phenomenal growth in population, Sri Jagjivan Ram said there was not only quantitative limitations in food but also serious qualitative deficiency. Children who needed balanced protein diets were the worst sufferers.

In India 75 million children fell within the vulnerable group. Any investment in social welfare could not produce the desirable results as the basic material--protein food--was defective. Hence it was imperative that the high-protein food should be manufactured on the commercial basis. For this, he assured, the Government would not spare any efforts.

About 190 delegates, including 135 from foreign countries, are participating in the Symposium.

Sri P. A. Narielwala, Chairman, Organising Committee and Sri M. K. Lingiah, Civic Chief, welcomed the gathering.

Messages received from FAO, WHO, UNICEF, NIH, AFT and CSIR were read.

Dr. Parpia, Director of CFTRI, proposed a vote of thanks.

Need For Spiritual Values

Mysore, July 3

"Deep awareness of the infinite nature of the spirit of the East is required to be harmoniously fused with the material advancement, economic resurgence and social regeenration of the West", said Vice-President Giri inaugurating Sri Srikanteswara Suprabbatham at Nanjangud today.

He said we are impressed by the great achievements of the modern world and the achievements of the welfare states but we cannot forget that these great advances have not prevented our descending into depths of horror like submarine warfare, atom and hydrogen bombs. We seem to be overpowered by the lust for power, mechanical and nuclear.

However, Sri Giri said, there is no cause for despondency or despair. We can generate collective enthusiasm for good or bad.

It requires superhuman courage like Lord Srikanteswara to swallow the poison of hatred, racial arrogance, diehard communalism, narrow regionalism and aggrersive lingusitc patriotism which have been assuming tremenlous proportions in the present day society, the Vice-President said.

Governor Pathak, who presided, said in the world which is torn by conflict where one finds peace is violated we must pray to God to grant peace on all sides and power to defend and protect our ancient civilisation.

Chief Minister Nijalingappa, who distributed momentoes, referred to the demand for Chamarajanagar-Satymangalam rail link made in the address presented to the Vice-President, and said it was a long-standing demand. He too would join them in pressing for it.

He also announced that Government would grant Rs. 50,000 for construction of steps to Kapini river near the temple for which Rs. 1.5 lakh is needed. The rest of the cost will be met out the Temple funds and the Municipality.

The Chief Minister awarded Sri Turuvekere Visveswara Dikshit, who has composed the Suprabhatam stanzas.

Earlier, Sri B.V. Pandit welcomed the gathering. Sri K. V. Venkatasubban read the messages. On behalf of the Nanjangud Municipal Council, President H. P. Sridharan presented an address to the Vice-Presideat. Sri B. V. Balasubramanyam proposed a vote of thanks.

RS. 2.75-CRORE SAVINGS

UNWANTED POSTS AXED

Bangalore July 5

Finance Minister Ramakrishna Hegde announced in the Assembly that the economy measures decided upon by the Government would save a total amount of about Rs. 2·75 crores.

He said the post of social education officers, industrial extension officers and animal husbandry extension officers will be abolished.

Along with them the posts of deputy block development officers are also being removed.

Some more unwanted posts are in the process of being axed.

Sri Hegde, however, refused to take immediate decision on the persistent demand to do away with divisional commissioners. They were there, he pointed out, to ensure the decentralisation of powers and the only provocation to abolish the posts would arise if they were not serving this purpose effectively. It should also be carefully considered whether or not they were discharging their duties properly. All this would take time and their future needed careful consideration.

WAGE FREEZE

The Finance Minister said that State Government might suggest to the Centre in the meeting of the State Finance Ministers coming off in New Delhi on Thursday that unless it took a bold and drastic step to effect a freeze of wages, profits and prices, it would be impossible to revitalise the economy of the country.

Unless this three-pronged freeze was resorted to, he was afraid that not even nationalisation of banks and general insurance would improve the situation.

2-Language Formula

The 30-member committee of MPs on education have recommended two-language formula in place of the present three-language formula for schools.

It recommends a ten-year schooling of which the primary stage envisages the study of only one language, regional or mother tongue.

At the second stage after the primary education, schools have to teach up to class 10 a language in the 8th schedule of the Constitution or English besides the regional language.

From standard 8, a third language may be taught as optional language.

While at the higher secondary stage only one additional language need to be tought besides regional language, at the university stage no language should be made compulsory. It should be optional.

Silkworm Pupae As Cattle Feed

Mysore, July 14

The Central Food Technological Research Institute has developed a method to process silkworm pupae as a source of protein in livestock and poultry feed.

A large quantity of silkworm pupae is available in Mysore, Assam, West Bengal, Orissa, Punjab and Kashmir and hitherto this was used only as a manure or was wasted. Although it was known to scientists that it could be used as a source of protein, this was not commercially possible in the country as the removal of the hard outer covering of pupae posed a serious problem.

The process developed at CFTRI involves mainly the removal of outer coating of pupae by chemical treatment, followed by washing, processing and drying The final product contains 55 per cent protein and 25 per cent fat.

RS. 2246-CRORE ANNUAL PLAN

TOP PRIORITY FOR FARMING

The highest priority in the second year of the fourth plan is given to agriculture, exports and family planning.

Nearly one-quarter of the total outlay, Rs. 523 crores is to be expended on agriculture, community development, cooperation and irrigation.

The annual plan for 1967-68 envisages a total outlay of Rs. 2.246 crores.

The Plan assumes a normal monsoon which is expected to yield 65 million tons of foodgrains. On this basis, it is calculated that the rise in national income in 1967-68 will be about 20 per cent, 12 per cent in real terms and 8 per cent due to increased prices.

The price rise for the year is estimated at 12 per cent, as against 15 7 per cent last year. The Plan states that in the event of good rains, prices may become stable for the first time in many years.

As regards industry, purchasing power will increase sharply if there is a good harvest, and the increased demand will result in industrial production picking up in the last half of the fiscal year. The rate of industrial growth may be 5 per cent as against 3 per cent the previous year.

The Plan paints a gloomy picture of the savings situation. The savings rate may slump in 1967-68 to only 6 4 per cent, as compared to 10.4 per cent in 1965-66. The goal of self-reliance, requires a savings rate of at least 20 per cent, seems very distant.

The annual plan was laid on the table of Parliament yesterday.

The Government had retrenched 238 erring officials and had terminated the services of 20 officers of the Board.

Chief Minister Nijalingappa said allegations that the Board had incurred heavy losses were exaggerated. In total transactions of over Rs. 8 crores in ten years, a loss of Rs. 25 lakhs was not much.

He gave a clean chit to three chairmen of the Boards and said 'no chairman had been responsible for any misuse of funds'.

Revive Spiritualism

CALL TO SADHUS

Mysore, July 29

A call to sadhus to revive spiritualism among the people was given by Sri Marthanda Varma, Elaya Raja of Travancore here yesterday.

He was inaugurating the third annual conference of the State Branch of the All India Bharat Sadhu Samaj at Exhibition Buildings.

He said that people in our country today were at the cross-roads of materialism and spiritualism. There was also an onsluaght on Indian culture and low faith among the people.

Hence, it was necessary that they should be assured and reassured of the ancient glory of our country in the spheres of religion and culture. The Sadhu Samaj should work towards this definite goal, he said.

Recapture Faith

SAYS MATHAI

Mysore, Aug. 2

There was a great need in the country today to recapture faith in ourselves and in our people, Prof. Samuel Mathai, Vice-Chancellor of the Kerala University, said here yesterday.

He was delivering the Sardar Panikkar Memorial Lecture on the occasion of the Fourth Foundation Day of the Regional College of Education at Manasa Gangotri.

Dr. Mathai in his critical outright address said in the country today there was collapse of traditional frame work of social order and lack of strong basic ideal personality.

If education is the growth of society, our society today provides very little incentive. There are many things happening of which we cannot speak as ideal character. The environment of our education is confused and contradictory. Education is corrupted and dangered by forces on which it had no control.

Our Plannin ghad been hapazard and there was no clear cut shape or plan in regard to education. There was an ill-framed growth happenieg in the country, Prof. Mathai said.

The Vice-Chancellor said our standards and hopes of bringing about a great future were all greatly affected by political and economic considerations. There was enough talent and this could be exploited by proper education.

Education, he said, should be free from present social and economic conflicts and placed fully in the hands of educational experts, like armed forces.

Sri Mathai said it was essential to have realistic confidence in future, have hope and not lose sight of united India. He hoped that in our foolish actions we would not destroy what providence had given to us, our motherland.

Dr. K. L. Shrimali, Mysore University Vice-Chancellor, who presided, disagreeing with Prof. Mathai said, what we saw today in our country was the birth-pangs of a new social order. If we did not look at the brighter aspect we were likely to get a distorted vision.

Earlier, Miss Chari, Principal, welcomed the gathering. Vice-Principal M.D. Devadasan proposed a vote of thanks.

RICE POSITION DIFFICULT IN NEXT 3 MONTHS

The Lok Sabha was told by Minister Shinde that the rice position in the next two to three months would be difficult, but with restraint and understanding, it should be possible to tide over the period.

He said the Government was continuing its efforts to get additional supplies of grain from abroad and step up internal procurement.

The US Government was considering a proposal for additional food aid to India, he added.

The Minister said the Government needed to distribute about one million tons of grain every month to maintain adequate availability of food in the country. Against this, the actual movement was restricted to between seven and eight lakh tons a month and some degree of hardship was, therefore, inevitable.

He said that the Government had not been able to keep stocks of more than one or two weeks requirements in any State.

"The monsoon so far has been satisiactory almost throughout the country, and provided the September rains are adequate, we may confidently look forward to an easing of the food situation", he said.

The period between June and September was always one of diminishing marketability and higher prices, he added.

Mangalore Port, A Must

Bangalore, Aug. 9

In his letter, he has pointed out that the Mangalore project was conceived much before the discovery of the iron deposits in Kudremukh. The machinery for the Mangalore fertiliser factory that would be arriving by 1969 and the iron ore exports from the Chitradurga-Tumkur region were itself sufficient to maintain the big harbour project. If anything, Kudremukh had only added to the importance of the Mangalore project.

Ourselves

It is a happy augury that the 'Independence Day' synchronises with the 'Birthday' anniversary of the 'Samachar'.

Born in 1950, it has completed 17 years and is entering the 18th today. Started first as a Kannada Daily, the 'Samachar' at the request of the reading public was converted into an English Daily, to supply the much needed want, since there was no English Daily in the City.

In May this year, though there was the sudden demise of its founder-editor Sri G. L. Swamy, 'Samachar' has continued to serve the reading public as in the previous days. We pay our humble homage to the late G.L. Swamy.

Completion of 17 years for a small newspaper like the 'Samachar' is not a small ahievement. Though the problems of newspapers are increasing everyday, 'Samachar' has continued to serve the public. The credit of it should go to its founder-editor.

We take this opportunity to express our gratitude to all those-our readers, advertisers and others-for their generous patronage and encouragement. We assure them our best and humble service in future also.

Old Manuscripts For Varsity

Mysore, Aug. 22

Rare and valuable Persian, Dakhni and Arabic manuscripts numbering 170 and 83 rare printed books have been acquired from the Shahmiriah Library, Cuddappah, and added to the Urdu, Persian and Arabic section of the Mysore University Manuscript Library.

These manuscripts and books are mostly works on Sufism produced by the three reputed Sufi brothers of South India, Shah Noor, Shah Meer and Shah Kamal and their descendents including Shah Muqbil of Mysore.

The Sufi brothers have carried much influence on the development of Islamic Sufism in South India and their works have attracted research scholars from all parts of the country.

Some of the manuscripts are authors' copies, three of them are fully decorated with gold and a dozen are very good specimens of Persian calligraphy.

This is a very valuable addition to the Urdu, Persian and Arabic section of the University Manuscript Library which is possessing nearly 800 Urdu, Persian and Arabic manuscripts.

A classified catalogue of the manuscripts has been prepared and is available for reference to visitors and research scholars.

FOOD SITUATION VERY BAD

U.S. FOOD AID DELAYED

The food situation in the country "is very, very difficult." The monsoon had been satisfactory and created a sense of confidence, but it would be some months before the kharif crop was harvested. 'We have to carry on with whatever we have till then. Our supply to the deficit States mainly depend upon arrivals of imports', Union Food Minister Jagjivan Ram stated yesterday.

He expressed concern at the delay in finalising the agreement with the United States for the import of one and a half million tons of foodgrains for the last quarter of this year.

He said 'our information is that the file about the agreement is lying on the table of President Johnson for the last three or four weeks'.

"Every day's delay makes us nervous", he added.

The Food Minister said that the last shipments under the current agreement with the U S. would end in the first week of October.

Unless further imports were available it would not be possible for the Centre to manage its supplies to the States in the last quarter of this year and the 'nation will be called upon to under-go very stringent austerity', he said.

India Should Treble Food Output

Unless India's rate of food production trebles in the next ten years, the country will have to depend on heavy imports to sustain the minimum levels of consumptior, far from attaining self-sufficiency.

This warning has been sounded by the United States Science Advisory Committee in its special report on the world food problem.

It estimates that to achieve self – sufficiency by 1977 India will have to

of grain. But at the existing annual production rate of 3 36 per cent, this target cannot be achieved and imports totalling 24 million tons will be required to close the gap between supply and demand in that year.

India will require 187 million tons of grain by 1988 to cater to an estimated population of about 850 million. This would be roughly provide 16 ounces a day per head.

Failure to achieve this target would mean import of 42 8 million tons of grain, costing

PROHIBITION GOES IN MYSORE STATE

Nehru Loka Scheme Remains

Mysore, Sept. 4

The proposed "Miniature Mysore" where all the tourist attractions of the State would be depicted through miniature models will be only one of the first few steps to be undertaken as part of the overall Nehru Loka scheme.

This was clarified at the Nehru Loka Committee meeting at Lalitha Mahal on Saturday. The Nehru Loka Scheme as originally envisaged stands in all details, it was assured.

The meeting presided over by Tourism Minister Mohammed Ali approved proposals to improve the existing Zoo, the Golf Course and to set up a Museum for antique coaches of armour.

LALITHA MAHAL

The Minister clarifying about the future of Lalitha Mahal, said the recent decision of the Government was only to effect the transfer of management from the General Administration Department to the Tourist Department.

He assured it would continue to be a guest house. Any improvements to Lalitha Mahal would be in keeping with the existing architectural style and would not in any way spoil the grandeur of the Palace. The idea was to put this building to better use, he said.

ANTI-POLIO SCHEME

Mysore, Sept. 4

For the first time in the State, the Polio Immunisation Scheme, was introduced in the City on Saturday by the City Municipal Council.

Inaugurating the scheme, Health Minister Puttaswamy complimented the Council for its lead over other civic bodies.

He suggested it to take over the Gunamba Maternity Trust, and expand its activities to cover all the children in the city.

Reminding the duties of the doctors, the Minister said doctors were not coming forward to serve in schemes like the Polio Immunisation as they considered them unattractive.

He said doctors with special knowledge had a duty to perform and that was service to the people.

Dr. Rama Rao, Health Officer, in his report said Rs. 15 000 had been provided in the budget for the scheme. It would cover all the 8,500 children born in a year on an average in the city.

Municipal President M. K. Lingiah presided. Health Committee Chairman J. M. Cutinbo welcomed the gathering and Vice - President Doulat Rao proposed a vote of thanks.

The meeting, among others, was attended by Health Minister K. Puttaswamy, Deputy Tourism Minister H.C. Boriah and senior officials.

END FOOD ZONES: ABOLISH FOOD & CO-OP. DEPTS.

ARC PANEL URGES

The Administrative Reforms Commission's study team on agriculture, which submitted its report yesterday at Bangalore, has recommended abolition of food and co-operative departments.

The following are some of the important recommendations:

Food zones must be abolished.

The national policy on agriculture must be re-oriented to provide strongest incentives to farmers to increase farm production. They include ensuring remunerative prices, insurance againt risks, war on pests and supply of fertilisers at reasonable prices.

The role of the Central Government in regard to agriculture should be limited.

The States should have full authority in the matter.

All ideological institutions like the cooperative farms which have no economic value and resulting in wastage of financial and technical man-power resources must be scrapped.

Large-scale farming on commerical basis must be encouraged.

The team provides for setting up a national commission of experts for assessing the potentialities of land and water and lay guidelines for their profitable utilisation.

It has urged expediting the implementation of land reforms in all States. Ownership of land under the law should be confirmed without any further delay.

It has also opposed to the State trading in foodgrains.

Chief Minister Nijalingappa stated here yester day that the language issue could be amicably settled if only the 'fanatical' northerners kept quiet without kicking up further dust for some more time.

He said 'Hindi is very much our language. Only it can be the link language'. There was no big opposition toHindi either from Mysore, Andhra or Kerala.

But he was sorry that some people in the North had chosen to be fanatical. What they did upset the people in the South and the East. The problem could be solved easier if only they kept quiet.

CHAGLA RESIGNS ON LANGUAGE

Sri M.C. Chagla, External Affairs Minister, has resigned in protest against the Centre's educational policy.

In his letter of resignation, submitted to the Prime Minister on Aug. 31, Sri Chagla said that educational policy of the Government was likely to threaten the unity of India and lower standards of education.

He said though he accepted the position that Hindi must ultimately replace English, the transition period of five years proposed for replacing English by regional languages in all States was most inadequate and impracticable.

Sri Chagla felt that this would lead to deterioration in education standards as regional languages had not developed enough.

English had brought about administrative, academic and judicial unity, whereas switch-over to regional languages would undermine the unity of the country. The new educational policy would lead to the blakanisation of the country. The administration in the Centre and the relationship between State and Centre would also receive severe jolt, he said.

RESIGNATION ACCEPTED

Prime Miuister Indira Gandhi has accepted the resignation of Sri Chagla.

In a letter to him, the Prime Minister rejected the assumption that the education policy was undermining unity of the country. "The maintenance of that unity in the midst diversity is an essential of ingredient of our policy", she said.

NO REACTION, SAYS CM

Mysore, Sept. 6

Chief Minister Nijalingappa told newsmen here today that he had no reaction to offer on the resignation of Sri M.C Chagla from the Central Cabinet.

"Every individual is left to act according to his own convictions. So also it is left to Sri Chagla to act according to his own dictations and feelings", he said when newsmen asked for his reaction.

Lalitha Mahal Will Be Hotel, CM

Mysore, Sept. 6

Chief Minister Nijalingappa said here yesterday that it had been decided to convert the Lalitha Mahal Palace in the city into a hotel on the lines of the five-star hotel being constructed in Bangalore.

He was inaugurating and switching on the lights of Rs 1 45-lakh Chamaraja Double Road.

The Chief Minister said that there were number of tourist spots around Mysore. The Government was doing its best for attracting more tourists. It was trying to see that foreign tourists who came to visit had a pleasant stay and Lalitha Mahal was found to be a suitable place for this purpose.

He said Mysore City had not developed enough due to lack of industries. But it was a matter of pride that the Mysore University had made rapid progress. The Government would give all encouragement to its further growth, he assured.

Sri Nijalingappa said that the Government was trying to develop Mysore City industrially. Mysore-Nanjangud area had been selected as an industrial complex for starting new industries. It was also proposed to start paper, rayon and wood-based industries using the forest wealth, he said.

The Government had already spent Rs. 7-8 lakhs for locating the printing press, a gift of the West German Government to print Kannada, Tamil, Telugu and Malayalam text books.

The Chief Minister praised the efforts of the Municipal Council in beautifying the city and said it had to be developed still more. It was with this view that Government had planned to create Nehru Lok and improve Lalitha Mahal, he added.

Demonstration Before CM

Mysore, Sept. 6

The Opposition members of the city made a protest demonstration before the Chief Minister while he was inaugurating the Chamaraja Double Road yesterday.

Sri M. N. Thimmiah, leader of the Opposition in the Municipal Council, pointed out to the Chief Minister, as he rose to address, that there was misuse of funds in the conversion of the road and demanded probe into it.

Other members including Messrs Aziz Sait, Vedantha Hemmige, T.V. Srinivasa Rao, A. Ramanna, B. N. Kenge Gowda joined him in waiving black flags and then walked out protesting.

Sri Nijalingappa described the incident as unfortunate. While undertaking such works it would not be possible to satisfy everyone.

Instead of making baseless allegations if the same were substantiated, theGovernment would not hesitate to institute an enquiry, he added.

Sri M. K. Lingiah, Municipal President, who presided, deplored the Opposition tactics.

Earlier, Municipal Commissioner B.R. Prabhakara welcomed and said the scheme costing Rs. 1,45,388 took seven months to be completed. There were 24 electric poles with 48 mercury 250-volt lamps on the four-feet island.

Mysore, Sept. 8

Chief Minister Nijalingappa laid the foundation stone on Wednesday for the 'Vidyarthi Grama', a Rs. 20-lakh ambitious project of the Mysore University.

The village will be on a 48-acre land opposite the non-resident student centre in Manasa Gangotri.

It has been proposed to collect Rs. 2 lakhs for each cottage from the respective district. Rs.one lakh will be spent on the building and the rest for providing food at subsidised rates.

GOVERNOR'S APPEAL TO SCIENTISTS

Mysore, Sept. 12

During his visits to foreign countries, Sri Pathak said, he had seen people working with a sense of dedication and concentrated devotion to develop their country. That spirit itself was an act of patriotism, he said.

When a war-devastated country like Germany could work wonders and remove the trace of devastations, he asked "why cannot we--500 million people- work with the same spirit ?"

Regional Media Inescapable

The Vice-Chancellors of 70 universities meeting yesterday at Delhi were in broad agreement over the adoption of regional language as media of instruction but many emphasised that the change-over should not be hustled.

Both Prime Minister Indira Gandhi and Education Minister Triguna Sen addressing the conference made it clear that a change-over to the regional languages as media of instruction was inescapable.

Dr. Sen however cautioned against an unplanned drift into the adoption of regional languages. He favoured a planned change with the basic objective of improving standards in education.

Along with the change-over, he said, the study of English should be strengthened because it gave the students direct access to the growing knowledge of the world.

FAO Plan For More Grain

The Director-General, Food and Agricultural Organisation, Dr. B. R. Sen, yesterday, proposed a food production resources programme of 500 million dollars annually to enable developing countries to produce the requisite inputs for increased grain.

Most of the amount would come through bilateral arrangements on a country-to-country basis, but 500 million dollars would be channelled annually through the FAO, according to Dr. Sen.

A world food survey by FAO has estimated that population in most developing countries would double in the next 18 years and family planning, which is gaining acceptance faster, would not bring any significant relief to the food-population situation in the next 20 years.

A permanent solution, therefore, would have to be found by concentrating on two things: increased agricultural productivity and rapid development of their external trade.

MEDIUM CHANGE IN UNDER-GRADUATE LEVEL

VICE-CHANCELLORS' DECISION

The conference of the Vice-Chancellors yesterday decided to retain English as the medium of instruction at the post-graduate and research levels while fixing a five to ten years limit for change-over to the regional languages at the under-graduate stage.

A resolution adopted said: "The manner and speed of the change-over should be left to the university system. This was in accordance with the recommendation of the Education Commission and was reiterated by the Education Minister.

'The conference recognised that the change-over, if properly carried out, would be a major step towards improvement of higher education and towards strengthening of its roots in our soil. The programme should be pursued in a sustained and systematic manner'.

In the case of all-India institutions, the present arrangements regarding the medium of education may continue as recommended by the Education Commission.

In the case of large cities with multilingual population, the medium of education may continue to be English in addition to the regional languages which the university would provide.

Dr. Kothari, Chairman, University Grants Comission briefing newsmen said universities would be given flexibility to switch over to the time-limit.

This flexibility did not mean felexibility of an individual university, but that the UGC would in consultation with universities, fixworkable time-limits for each university, considering its individual requirements as well as the different subjects taught there.

Serifa Kadrija, a women who has never heard of a caesarean section, performed this complex operation on herself by means of a simple used razor blade.

Unable to bear the birth throes, Serifa decided to cut her abdomen and to take the baby out. First she made a ten-cm. deep section from the navel down, and then cut the womb, but in the opposite direction. The cutting over, she took out a round 4.25-kilo boy.

Food Zones To Stay

The Chief Ministers Conference yesterday at Delhi agreed to make all efforts to achieve an overall procurement target of seven million tons from this year's kharif crop without disturbing the existing single-State zones or procurement methods.

She urged all the Chief Ministers irrespective of their political predilictions to consider the food problem from the point of view of the whole nation.

Sri Jagjivan Ram told the Chief Ministers that the Centre would set apart a portion from the small imports for building a buffer stock. He warned them that world surpluses of food were dwindling and the terms of food aid more onerous. At any rate food aid of the magnitude received in the last two years was a thing of the past.

Pope Paul says that 'India is a spiritual country. It has in its nature a sense of the Christian virtues. If there is any country in which the beatitudes of the sermon of the mount can ever become a reality for the mass of the country, that country is India.

What was nearer to the souls of Indians than sweetness, peace, mercy, and pureness of heart, he asked.

'Life in India runs in contemplation. People speak in a low voice. Their movements are slow and liturgical. These are countries born for the spirit', Pope said.
